PROFESSIONAL SUMMARY

Final-year Electronics and Computer Engineering student with hands-on experience in software development, database management, and deployment workflows. Skilled in Java, Python, SQL/PL-SQL, and modern web technologies, with a strong foundation in Data Structures, Algorithms, and Object-Oriented Programming. Demonstrated ability to design, develop, test, and deploy applications, troubleshoot technical issues, and collaborate effectively in team environments while adapting quickly to new technologies and business requirements.

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, C

Web Technologies: HTML5, CSS3, JavaScript

Database Management: Oracle SQL, PL/SQL, MySQL, Firebase

DevOps / Deployment: CI/CD workflows, Build & Deployment Verification, Git, GitHub

Electronics & Simulation: Verilog HDL, Cadence (Virtuoso), R Studio, Cisco Packet Tracer

EDUCATION

Bachelor of Technology - Electronics and Computer Engineering

07/2023 - 07/2027

VIT University, Chennai | CGPA: 9.04/10.0

- Relevant Coursework: Data Structures and Algorithms, OOP, Database Management Systems, Computer Networks, Operating Systems

INTERNSHIP EXPERIENCE

Summer Intern - Dilligen Technologies, Salem

05/2025 - 07/2025

- Deployed, monitored, and validated web application stacks using the in-house Nimbuz platform, contributing to stable builds, successful deployments, and smoother CI/CD workflows across multiple environments.
- Collaborated with the Astra team to identify, troubleshoot, and report deployment issues, improving deployment reliability and feedback turnaround in production-like environments.

PROJECTS

A Gamified Carbon Credit Tracker Web App

- Built a responsive full-stack web application allowing users to log eco-friendly actions and earn carbon credits, with a gamification system of badges and levels.
- Integrated Firebase for authentication and real-time data handling.

8-Bit R-2R Ladder DAC using FinFET Technology (VLSI)

- Designed and simulated an 8-bit R-2R DAC using 28nm FinFET technology in Cadence Virtuoso, covering schematic design, layout exploration, and transient analysis.
- Achieved improved linearity and reduced leakage compared to traditional CMOS implementations.

Polyglot Minutes

- Developed a multilingual speech processing tool using Whisper to transcribe and translate audio in real-time, with language detection and sentence-segmentation visualization.

Movies Query Tool (DBMS Mini Project)

- Developed an interface to retrieve movie information from a SQL database, designing the schema and CRUD queries to ensure accurate, low-latency backend-frontend interaction.

WiFi vs Cellular Signal Strength Analysis using Wireshark

- Captured and analyzed network packets using Wireshark to compare WiFi and 4G/5G performance across latency, throughput, packet loss, and signal stability.

CERTIFICATIONS

- Google Cloud Data Analytics Certification (07/2026)
- C++ Training & Certification - IIT Bombay - 80% (04/2024)
- C Training & Certification - IIT Bombay - 75% (04/2024)
- Python Training & Certification - IIT Bombay - 70% (04/2024)
